UK Ltd Invoice Chase Swipe File

Six copy-ready chase emails, a phone script and a chase record.

What's inside

• When to send what	p.2
• Six chase emails	p.3
• Phone call script	p.5
• Chase record	p.6

How to use it

1. Check the invoice really is overdue and was sent to the right person.
2. Send the email that matches the number of days overdue.
3. Fill the [square brackets]. Keep it short and calm.
4. Log every chase. If you reach the last email, get proper advice before going further.

Print it or type into it

Print at 100% on A4, or copy the emails straight from the PDF. For business-to-business invoices. Not legal advice, and not a letter before action.

Check the invoice has the purchase order number if they use them, went to their accounts address, and has your bank details on it. Half of late payments are paperwork.

Notes

A call often gets paid faster than three emails.

- Ask for accounts payable, or the person who signed off the work.
- "I'm calling about invoice [number] for £[amount], due on [date]. Can you see it on your system?"
- If yes: "When is it scheduled to be paid?" Write the date down.
- If no: "What's the best email to send it to?" Resend while you're on the phone.
- If there's a problem: "What do you need from me to get it approved?"
- End: "So that's £[amount] by [date]. I'll email to confirm." Then send email 4.
