

Exam Countdown

The last 30 days before an exam, planned one small focus at a time.

What's inside

• 30-day countdown	p.2
• 14-day plan	p.3
• Final 7 days	p.4
• Per-exam cards	p.5
• Night before and exam-day checklist	p.7
• After each exam	p.8

How to use it

1. Write the exam date on the 30-day page and count back.
2. Each day gets one focus. Small and specific beats 'revise biology'.
3. From day 14, swap reading for past papers and active recall.
4. Use the exam-day checklist the night before. Then sleep.

Print it or type into it

Print at 100% on A4, or click into any box to type. The calendar file in your download adds revision blocks to your phone's calendar.

30-day countdown

One focus per day. Tick when done.

Night before

- ## Exam morning

- ## In the exam

- ## Notes

Two minutes, then let it go. The next one matters more.
