

Habit Tracker

30-day and 90-day habit grids (up to eight habits). Habit-stacking line: after X, I do Y. Miss-day recovery rule so one gap does not end the month. Morning and evening split. Weekly review: keep, drop, shrink. Chain version and two-day minimum version.

Miss-day recovery rule

One missed day is a gap, not a personality. Do not wait for Monday. The recovery rule: never miss twice on purpose. If you missed yesterday, today is a two-day minimum - do the smallest version and mark it. The month is not over.

Habit-stacking line

After X, I do Y. Write the stack before you draw the grid.

After X	I do Y	AM / PM

Morning / evening split

Chain version

Mark a link for each day you did the habit. The chain is a picture, not a moral score. Breaks are recovered with the miss-day rule.

Habit	Chain start	Links so far	Broke on	Restarted

Two-day minimum version

When a full habit will not fit, do the two-day minimum: the smallest version, two days in a row. Then resume the grid.

Habit	Smallest version	Day 1	Day 2
